Will Baker CV

I'm a graphic designer and front-end developer studying at Loughborough University. My work focuses on thoughtful, user-led design, whether that means creating visual identities, building accessible websites, or developing bold campaigns that connect with people.

I've explored everything from rebranding city landmarks and crafting modular typefaces to designing packaging for fictional brands and running inclusive design research based on personal experience. I care about clarity, consistency and finding the right tone for the right audience.

My portfolio can be found on my website: https://willb.cc

Skills

- Highly skilled in the Adobe Suite including Photoshop, Illustrator, InDesign and After Effects
- Proficient in Figma, Glyphs (font development software) and Blender
- Creation of cohesive brand systems across digital and physical media, including logos, signage, campaigns, and packaging.
- Focused on accessibility and user-centered design; proficient in wireframing, prototyping, and responsive layout creation.

Projects

Accessibility in Design

As part of my personal investigation for Graphics A level, I looked into the topic of accessibility within design, specifically eyesight and different forms of blindness:

- Designed and conducted primary research survey analyzing colour blindness factors in design, gathering data on visibility, spacing, and shape recognition
- Created targeted awareness campaigns for diverse demographics, from professional optician posters to youth-focused educational materials
- Developed innovative "unorthodox marketing" approach using McDonald's advertising as a case study for colour accessibility issues

Open Source Contributions

- I have made contributions to a popular framework for creating websites by improving accessibility for right-to-left language users in their documentation. Used by around 6 thousand people weekly.
- Developing complex software to help streamline theater mixing with multiple consoles listening to the same sources.
- Creating plugins for various programs in the Adobe Suite to help optimise long or tedious tasks in a quick and efficient manner

Technical & Design Consultant

- Responsible for designing and building a website, creating comprehensive in-house documentation that streamlined onboarding for 15 new employees, designing and creating APIs and databases, and planning infrastructure for scalability without performance degradation.
- Utilized my expertise in web development, API design, and database management to complete projects faster than projected timelines, resolve technical issues promptly, and contribute to a major product launch that significantly boosted company revenue.

Work Experience

Loughborough Student Union — NOV 2024 - NOW

Technical Team Leader

- Manage and train a team of 20 members, liaising with other department managers to advise technical details for external events.
- Setup of audio visual equipment including radio mics, speakers as well as lighting systems.
- Set up the venue for both internal university events and external corporate events.
- Created dynamic and immersive lighting effects for popular club nights.
- Monitoring, maintenance and repair of equipment to ensure smooth operations.

Loughborough Town Hall — NOV 2024 - JAN 2025

Lighting Operator

- I worked with the theatre lighting operator to put on two shows daily for 2 months, with a cast of 25 and an audience of 500.
- I was responsible for the loading and operation of the atmospherics and special effects.
- Ran extensive fixture checks before each show to avoid any issues during the show.

Education

Loughborough University — SEP 2024 - NOW

Graphic Design B.A.

- Currently studying for a BA in Graphic Design
- Acheived a first during my first year

The Royal Grammar School, High Wycombe — SEP 2022 - JUN 2024

A Levels

- Acheived an A* in Graphic Design, A in Computer Science and a C in Psychology
- Whilst studying I was subject ambassador for Graphics, running clubs to teach Photoshop and Illustrator to lower years.
- Designed and edited the schools magazine and newspaper.

The Royal Grammar School, High Wycombe — SEP 2019 - JUL 2022

GCSEs

- 9 GCSEs from grades 9-6 (A* - B), including a 9 in Graphic Design and Computer Science
